Education

PhD in Economics Princeton University	Expected 2024
MA in Economics Princeton University	2020
MSc in Econometrics and Mathematical Economics, <i>Distinction</i> The London School of Economics and Political Science	2018
BSc in Econometrics and Mathematical Economics, <i>First Class Honours</i> The London School of Economics and Political Science	2017

Teaching and Research Fields

Primary fields: Labour, Public, Gender economics

Working Papers

‘Welfare Reform and Fertility’, October 2022, *under review*

This paper studies the fertility effects of 1990s-era welfare reform in the US, which ended unconditional cash assistance to low-income mothers. I show that individuals more likely to be on welfare pre-reform and thus more likely to be affected experienced larger fertility declines after the reform relative to those less likely. Moreover, this effect is larger in states with more generous pre-reform welfare payments. A back-of-the-envelope calculation suggests that welfare reform in the 1990s may explain over 24% of the decline in overall U.S. fertility between 1992 and 2000. These results have implications for current debates on reinstituting unconditional cash benefits through the Child Tax Credit.
